

Synergy effects generate innovation

PRONTOMED

Member of ASECA GROUP

ASECA

Two leaders in the technology sector create innovative products for a wide range of applications

Our international team works together to develop patented, alcohol-free products based on ECA technology and the polyhexanide-betaine complex, for the health sector and the consumer market.

- efficient disinfection on ecological basis
- surgical dressing to enhance healing process
- germ-killing decontamination without formation of resistance
- unrivalled range of products against germs, bacteria, fungus and viruses
- as solvents, sprays, gels and foams

ASECA – Quality leader in ECA technology

ASECA has an interdisciplinary team of scientists, engineers and technicians which has developed ECA technology at the highest level to a state of series production and commercial viability. Our global network ensures that the ASECA Group pursues its objectives from its base in Zug with the precision, reliability and innovative creativity so typical of Swiss companies. In PRONTOMED we have found an ideal partner in the field of medical and health care products.

Group, specializing in items for infection prophylaxis and medical care products, and is an ideal enhancement to ASECA technology.
